How does an automated photography studio work?

Insert

Place the product on the rotating platform. Tools such as laser centering ensure consistent position of every product.

Capture

MODEVIEW software allows to take up to 360 photos of the product from different angles. You can convert your photos into a rotating animation with just one click.

Publish

The ready-to-publish photos and animation can be immediately uploaded on the website or sales platform. MODEVIEW Cloud generates HTML5 code for easy 360° animation embedding.

With MODEViD you will get

- Intuitive and user-friendly interface
- Advanced image post processing software
- Auto background removal
- Super Focus (focus stacking)
- 360° animations in HTML5 and VIDEO clips
- Upload to YouTube and MODEVIEW account
- Adjustable turntable
- LEDs control with adjustable light intensity
- Camera control with adjustable settings
- Ability to create settings templates
- 'Live' picture editing

MODEVIEW Cloud features

Easy and fast publishing on websites, sales platforms and social media:

- 360° presentation
- Mini photo gallery
- QR code, GIF, MP4

Together with buying our system for automatic product photography you receive a free training in the use of the device and full support with the implementation. We also offer dedicated individual training.
