How does an automated photography studio work?

### Insert

Place the product on the rotating platform. Product photography with Twister is simple and easy, even for people who have not dealt with professional photography before.

### Capture

MODEVIEW software allows to take up to 360 photos of the product from different angles. You can convert your photos into a rotating animation with just one click.

### Publish

The ready-to-publish photos and animation can be immediately uploaded on the website or sales platform. MODEVIEW Cloud generates HTML5 code for easy 360° animation embedding.

## With MODEViD you will get

- Intuitive and user-friendly interface
- Advanced image post processing software
- Auto background removal
- Super Focus (focus stacking)
- 360° animations in HTML5 and VIDEO clips
- Upload to YouTube and MODEVIEW account
- Adjustable turntable
- LEDs control with adjustable light intensity
- Camera control with adjustable settings
- Ability to create settings templates
- 'Live' picture editing

## MODEVIEW Cloud features

Easy and fast publishing on websites, sales platforms and social media:

- 360° presentation
- Mini photo gallery
- QR code, GIF, MP4

Together with buying our system for automatic product photography you receive a free training in the use of the device and full support with the implementation. We also offer dedicated individual training.
